Update on the Dengue situation in the Western Pacific Region

Northern Hemisphere

Cambodia

As of 5 September 2017, a total of 2,102 suspected dengue cases were reported in 2017. The total number of reported dengue cases including dengue haemorrhagic fever and dengue shock syndrome was lower than the 3 year-threshold of the same period from 2014-2016 (Figure 1).

National Health and Family Planning Commission, China
**Lao PDR**

As of 1 September, there were 7,708 cases of dengue with 10 deaths reported in Lao PDR in 2017, with 533 cases reported in epi week 35. Dengue activity is high with the number of reported cases this year exceeding the epidemic alert threshold (mean+2SD) (Figure 3).

**Malaysia**

In week 36, 2017 (from 3 to 9 September 2017), 1,223 dengue cases were reported, increased of 4.4% compared to week 35 (Figure 4). As of week 36, the cumulative number of dengue cases in 2017 was 66,906 with 149 deaths compared to 78,077 cases with 176 deaths during the same period in 2016.
Philippines
A total of 67,601 dengue cases were reported nationwide from January 1 to August 12, 2017. This number is 40.4% lower (113,471) than that for the same period in 2016. As of 12 August, 366 deaths were reported among reported dengue cases in 2017.

Communicable Diseases Division, Ministry of Health, Singapore
Viet Nam

As of 27 August 2017, there were 108,925 cases of dengue reported in Viet Nam including 26 deaths. Compared to the same period in 2016, the cumulative number of cases increased by 43.5% and the number of deaths increased by seven. Although majority of cases reported remain from the South (51.2%), a sharp increase in the number of cases has been observed in the North (almost 27 times compared to the same period last year), especially from Ha Noi with 22,296 cases.

Pacific Islands Countries and Areas

French Polynesia

Between week 33 and 34, there were 39 confirmed cases reported. Among these, 28 cases (71.8%) were confirmed as DENV-1 infection and 19 cases (49%) were children under 15 years of age.

New Caledonia

As of 12 September, 2017, 4,495 dengue cases were reported in 2017. There is downward trend in the number of reported cases since week 16 (Figure 10).
